

Advanced / Cyber Security Assessment

Diverse IT Capabilities

Accelerate's advanced cyber security assessment delivers a more in depth picture working to CIS global standards and is appropriate for companies looking to:

- + Take a significant step forward in security maturity with a more comprehensive view of their position and potential actions.
- + Investigate if their existing controls are still appropriate in the current risk environment.
- + Demonstrate to clients, suppliers and employees their robust cyber position

Aimed at organisations with diverse IT skills in-house (specialist roles, potentially including cyber security) but looking for external experience and support, our advanced assessment gives a thorough report with data and analysis around your specific scenario and options.

Typical time commitment is just **1 day for the report to be researched and produced.** The assessment is also a good platform for teams looking to enhance their cyber qualifications.

Asset Management

- + Identify Critical Assets
- + Asset Inventory
- + Asset Requirements
- + Asset Management
- + Data Information Assets
- + Facilities & Locations

Controls Management

- + Controls Objectives
- + Controls are Implemented

Configuration & Change Management

- + LifeCycle of Assets
- + Integrity of Technology
- + Asset Configuration

Vulnerability Management

- + Vulnerability Root Cause
- + Vulnerability Process
- + Vulnerability Analysis
- + Vulnerability Exposure

Situational Awareness

- + Threat Communication
- + Threat Monitoring

Incident Management

- + Incident Process
- + Incident Detection
- + Declaring Incidents
- + Recovery Process
- + Post Incident

Training and Awareness

- + Training Activities
- + Cyber Security Awareness

Service Continuity Management

- + Service Continuity Execution
- + Service Continuity Plans
- + Service Continuity Reviews
- + Service Continuity plans

Risk Management

- + Identify Risk
- + Risk Tolerances
- + Risks Identified
- + Risks are Analysed
- + Risks to assets

External Dependencies Management

- + Identify Dependencies
- + Identified Risks
- + External Relationships
- + Performance
- + Dependencies on public services

If you would like more information regarding our cyber security assessment, please do not hesitate in reaching out to the team.

Select the right assessment for your organisation

If the advanced assessment is not right for your organisation, please see below our alternative security assessment options that help address the most common requirements our clients request.

Essential / Assessment

Limited IT Capabilities

Our entry-level assessment provides excellent value for organisations who have limited IT capabilities, are taking the first steps with cyber security, looking to get an overview of the current controls and for those looking for a long-term partner offering expertise.

Custom / Assessment

Dedicated IT Capabilities

The Custom Assessment is designed specifically for your unique security requirements and generally fits organisations with large volumes of data or highly sensitive information. It is generally suited to organisations working toward ISO27001 or other recognised standard, and our structure would reflect this and the business goals of the organisation.
