

Essential / Cyber Security Assessment

Limited IT Capabilities

Our entry level assessment provides excellent value for organisations in the following positions:

- + Having limited IT capabilities (without specialist internal resource around cyber security)
- + Taking the first steps and getting to grips with cyber security
- + Looking to get an overview of the current controls and where exposure exists
- + For companies looking for a long-term partner offering expertise, support and services to supplement internal IT skills.

Accelerate's essential cyber security assessment is offered at the reduced price of £995 to support organisations in progressing their security maturity at a time when the threat landscape is scaling rapidly.

With just half a day's time commitment, the assessment is a highly efficient way to understand your security maturity and supports moving towards advanced or custom assessments in future where appropriate.

Select the right assessment for your organisation

If the advanced assessment is not right for your organisation, please see below our alternative security assessment options that help address the most common requirements our clients request.

Advanced / Assessment

Limited IT Capabilities

Our advanced assessment delivers a more in-depth picture working to CIS global standards and is appropriate for companies looking to take a significant step forward in security maturity, investing their existing controls and demonstrate their robust cyber position.

Custom / Assessment

Dedicated IT Capabilities

The Custom Assessment is designed specifically for your unique security requirements and generally fits organisations with large volumes of data or highly sensitive information. It is generally suited to organisations working toward ISO27001 or other recognised standard, and our structure would reflect this and the business goals of the organisation.
